Peter RISKO

curriculum vitae

Personal data

- Date of birth: 22nd June, 1976.
  Marital status: out of wedlock.
  Citizenship: Hungarian.

Education

- Between 1990 and 1994 I studied at the Madách Imre Grammar School in Budapest. In the first two I majored in history, in the third and fourth classes I chose physics. I graduated high school with good results in 1994.
- In 1995 I got an intermediate grade certificate in computer usage.
- Between 1996 and 2000 I studied Computer Engineering at Gábor Dénes College specializing in Application of Computers. Having fulfilled my college obligations I devoted time to broaden my practical knowledge.
  In the spring of 2003 I received a very good class diploma.

Working experience

- From October to December, 2003 I worked for Aktívrekord limited. My job was to develop the data maintenance unit in a larger project. I utilized the Struts framework, JSP, JDBC (SapDB 7), and the JasperReports package in my work.
- From July to October, 2003 I worked on the portal of "Motesz" (a webportal mainly for doctors, www.motesz.hu). In this project we used a home-made Java Servlet based framework, the Velocity template and the OJB persistency manager.
- In 2002 and 2003 I configured Debian/GNU Linux hosts as a freelance server administrator. By these jobs I acquired more experience about setuping and maintaining Internet hosts, gateways, firewalls, mail-exchangers, etc.
- My diplom work was a file registry application written in Java. It was made for my former dispenser, PK-Econo incorporated. During the development I enhanced my practical knowledge of UML, JDBC, and the SWING package.
- From November, 2000 till September, 2001 I worked for Morgan Hill Consulting. I participated in the development of the online shop of the "Központi Antikvárium" (the largest second-hand bookstore in Budapest, www.bookline.hu). We used various J2EE techniques (EJB, JSP, RMI) in the server side, and HTML and CSS for the representation. We used the Postgresql RDBMS as a database backend.
  In addition to programming I installed and maintained the Linux based application server, and established secure links over the Net between the shops and this server (Debian/GNU Linux, RAID, IPSec, PPTP configuration, DBA tasks).
- From 1995 till 2000 I worked for PK-Econo Incorporated as a network administrator. I was responsible for establishing the network and computer environment. After that the maintenance and support were my main tasks (Novell 4.1 server, approximately 30 MS-Windows client). I also was responsible for keeping contact with outside programming and servicing companies too. Besides I did smaller programming jobs mainly in Pascal, DBase and MS-Excel.

Languages

- Hungarian; mother tongue.
- English; intermediate level (ITK language exam), strong knowledge of the computer language.

Field of interest

- Music, cycling, swimming. I have been singing in the Vox Voluptatis choir since 1994.
